

School Stock Inhaler Treatment Parent / Guardian Notification Letter

THE UNIVERSITY OF ARIZONA HEALTH SCIENCES
**Asthma & Airway Disease
Research Center**

of Notifications: _____

School: _____

Date _____

To the parent/guardian of _____

We would like to inform you that your student received an emergency albuterol inhaler treatment administered with a LiteAire® (disposable holding chamber) from the school's stock inhaler program today.

The treatment was provided because the following was observed:

- Wheezing
- Coughing
- Shortness of breath
- Chest tightness
- Difficulty participating in P.E. because of respiratory symptoms/asthma
- Other _____

In addition:

- Personal inhaler unavailable/expired
- EMS was contacted for respiratory distress
- Other _____

The school stock albuterol inhaler is *not* intended to replace a student's personal inhaler, it is available for emergency respiratory distress only.

To give your student the best health support possible during school, we highly recommend your student be evaluated by a healthcare provider to determine if your student's asthma is controlled on their current asthma plan.

If your student does not have a diagnosis of asthma, inform your healthcare provider about this incident so they can evaluate your student. Take this letter to share with your provider.

If your student does not have a healthcare provider, visit www.211arizona.org, or by dialing 2-1-1 within Arizona to find a list of healthcare providers including those that provide low-cost services.

For any questions, concerns, or additional information, contact your school health office/health services at _____

Thank you,
